

# DHL Connection Guide

The following information is required to use the DHL Mailing Web Service:

- Your EKP number
- Login and password for the DHL business customer portal. Please create a new user for us.
- The product “Send” must already be activated for you. If you have any questions, please contact your DHL contact directly.

In Wemalo, shipping profiles are created under [Configuration->Shipping profiles](#). A shipping account should also be set up for DHL to store the above information. Subsequently, shipping profiles can be stored referencing the account, e.g. for the different shipping products of the provider.
